

YOUR PARTNER FOR USED COOKING OIL AND GREASE TRAP SERVICES

CHOOSE THE PARTNER YOU CAN TRUST TO PROVIDE WHAT YOU NEED

Managing the daily tasks at your restaurant requires focus. When it comes to issues like dealing with the storage of used cooking oil or grease trap maintenance, you deserve a partner who can provide professional, proficient and sustainable service...so you're free to serve your customers with the attention and care they demand.

LOCAL SERVICE ON A NATIONAL SCALE

As North America's only national service provider in our industry, we strive to provide service that is tailored to local and store-specific needs. Better yet, our sustainable and environment-friendly operations and services help our customers meet their own sustainability goals.

Adding value through service and innovation

A DARLING/GRIFFIN BRAND

DAR PRO
SOLUTIONS

DARLING
INGREDIENTS

USED COOKING OIL REMOVAL

- Solutions for the collection of used cooking oil (UCO)
- 100% of UCO re-purposed into a value-added product
- National coverage, local service – for large chains to independent operators

GREASE TRAP MAINTENANCE

- Store owners are responsible for what happens to the material removed from their traps
- Trained service techs ensure all service visits comply with current local, state and federal ordinances
- We re-purpose the material we remove from grease traps where regulations allow, often as feedstock for power generation
- Material that cannot be recycled is disposed of in an environmentally secure manner at licensed facilities

INDUSTRY-LEADING USED COOKING OIL STORAGE EQUIPMENT

- Industry's most diverse line of collection equipment offers a solution for any store's volume and size
- Our direct pump solution eliminates manually transferring hot grease from fryer to tank, keeping the process cleaner and safer for your employees
- Moving your grease collection indoors helps prevent grease theft as well as drips and slips
- Our equipment could be installed AT NO COST to you; call us for a free site visit to assess your UCO needs

All our indoor equipment provides our 4S Solution:
Simple. Safe. Sanitary. Secure.

1500GRN

B.O.S.S. Space Saver

Fat4Fuel Tank

Cleanstar 1500

Outdoor Bins

- Our models include the economical **1500 GRN** and **Fat4Fuel** tanks; our **B.O.S.S.® Space Saver** featuring a small footprint and extra shelf storage; and our long-lived, premium **CLEANSTAR®** line. Options available for indoor or outdoor installation for different volume capacities
- Outdoor bins in various sizes; theft-deterrent lids in some areas of country

DAR PRO
SOLUTIONS

DARLING
INGREDIENTS

CUSTOMER SERVICE EXCELLENCE

- We pledge excellence in customer services, 24/7/365
- Our National Service Center offers dedicated representatives who understand the needs of your business to manage national and regional chains
- Our inside sales team and use of paperless agreements simplify account processing and reduce our carbon footprint
- National coverage – we verify and qualify third-party professionals to deliver our high standard of service in geographic areas where we don't have a presence
- The 41st largest private fleet in the U.S., we use scheduling and routing software with on-board computers to provide the most efficient and reliable service to our customers

YOUR GREASE TO OUR BIOFUEL

OUR SERVICES HELP OUR CUSTOMERS MEET THEIR OWN SUSTAINABILITY GOALS

The National Renderers Association reports **4.4 billion pounds of used cooking oil is collected** in the U.S. and Canada each year. That's a lot of used grease that needs to be handled.

Working together, DAR PRO Solutions and our customers contribute to a more sustainable world by re-purposing this grease, as well as the inedible meat proteins we collect from grocers and the retail food industry, into biofuels, animal feed or products used in a variety of household and commercial goods. **Our biofuel efforts have helped increase the value of used cooking oil.**

PIONEER IN BIOFUEL DEVELOPMENT

Our company, Darling Ingredients, has paved the way for transforming animal fats and used cooking oils into biofuel. Our two plants in **Butler, Kentucky** (1997) and **Montreal, Canada** (2005, under our Rothsay brand) were the first commercial facilities in both the U.S. and Canada to use animal fats and cooking oils to produce biodiesel. These operations are still producing clean, energy-efficient biodiesel today.

In 2013, our **Diamond Green Diesel** facility began producing renewable diesel (read more about "DGD" below). Located alongside Valero Energy's Norco, Louisiana refinery, DGD is the largest facility in North America to convert recycled animal fats and cooking oils into a fuel that is almost identical to petroleum diesel, yet has an **85% reduction in greenhouse gas emissions.**

A CLOSER LOOK AT DIAMOND GREEN DIESEL

Recycled animal fats and used oils are brought to the Diamond Green Diesel facility by truck and rail, where they are processed into renewable diesel and can be distributed with petroleum diesel via the pipeline infrastructure.

DIAMOND GREEN DIESEL – A WIN FOR THE FOOD INDUSTRY AND FOR DAR PRO SOLUTIONS

- Joint partnership between **Darling Ingredients and Valero Energy**; began production in 2013
- **Largest North American facility** to produce renewable diesel from animal fats and used cooking and distiller oils (Norco, Louisiana)
- **DGD processes 10%** of the nation's animal fats and used cooking oil
- Currently producing **160 m gallons/year**
- **Expansion to 275 m gallons** by 2Q-2018
- **Lowers greenhouse gas emissions** up to 85% as compared to petroleum diesel
- Renewable diesel is chemically identical to petroleum diesel, and can be dropped into and **distributed via the pipeline**
- By creating a steady demand for recycled fats and oils, **DGD has helped maintain the value of used cooking oil**

About Darling Ingredients

Darling Ingredients Inc. is the world's largest publicly-traded developer and producer of sustainable natural ingredients from edible and inedible bio-nutrients. Darling Ingredients creates a wide range of ingredients and customized specialty solutions for customers in the pharmaceutical, food, pet food, feed, technical, fuel, bioenergy and fertilizer industries. With operations on five continents, the Company collects and transforms all aspects of animal by-product streams into usable and specialty ingredients, such as gelatin, edible fats, feed-grade fats, animal proteins and meals, plasma, pet food ingredients, organic fertilizers, yellow grease, fuel feedstocks, green energy, natural casings and hides. The Company also recovers and converts used cooking oil and commercial bakery residuals into valuable fuel or feed ingredients. In addition, the Company provides grease trap services to food service establishments, environmental services to food processors, and offers their own line of restaurant cooking oil collection equipment.

About DAR PRO Solutions

DAR PRO Solutions is a U.S.-based brand of Darling Ingredients focusing on providing professional grease services to restaurants, supermarkets, hotels, and others in the hospitality or foodservice industry. DAR PRO Solutions collects used cooking oil from its customers and transports it back to Darling's national network of facilities where it is cleaned of impurities and water and used as a nutritional ingredient in animal feed and pet food, as a feedstock for biofuel, or for other commercial and industrial applications, such as soaps, cleansers, paints, plastics, and more. DAR PRO Solutions also provides customers proprietary used cooking oil collection and storage equipment for both indoor and outdoor installations. DAR PRO Solutions also offers professional grease trap services to ensure customers are meeting all required environmental codes for wastewater streams feeding into a municipal water treatment supply. The DAR PRO Solutions brand was established in 2012 after the acquisition of Griffin Industries by Darling Ingredients in 2010.
