- Pre-install survey
- Service agreement

System Includes:

- Operation/Installation Manual
- Operational Storyboard
- Warranty: 1 year parts / 90 days labor
- UL listing

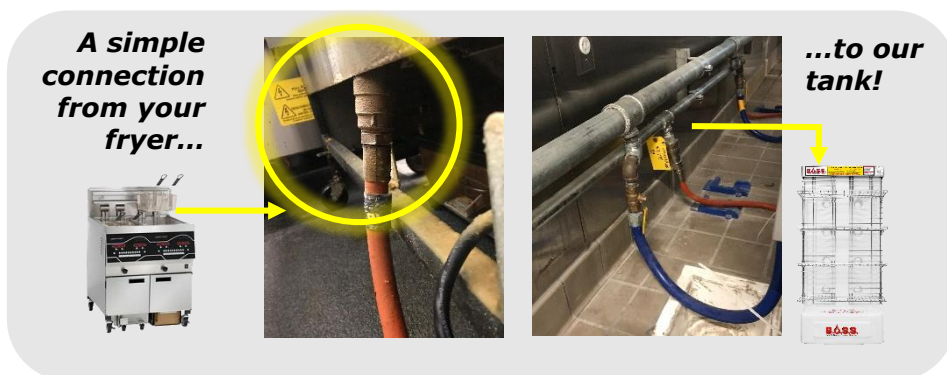

Transfer **hot** grease with the push of a button!

Direct Pump System

In certain applications, the filter pump on your fryer can transfer used cooking oil directly to the Cleanstar® unit. A direct pump "hands-free" solution keeps the process safer and cleaner for your employees.

How does this application work?

Simply use your Fryer Connection Port to pump used oil directly to our tank (see images on the right).
